DIETARY

➤ Solutions ➤

To Our Valued Customers, Momentum Dietary Solutions to embark on a new path!

Later this year, Momentum Dietary Solutions will be changing our name to Meal Metrics. Our exciting new branding is just that – new branding! As part of the new ownership agreement reached in the Fall of 2008, we were permitted to retain and use the Momentum Dietary name for a period of 3 years. That time is coming upon us, and we are very pleased with our new name and logos:

You will continue to receive the same high level of service from the same people in our company – the only thing changing over time is our name and logos.

In addition to continuing to provide our customers with our full service, client server Momentum Dietary Management Software package (or Classic Application), we will be introducing a new web-based Tray Card module, branded Meal Metrics WEB.

The Meal Metrics WEB software will be a subscription based solution that customers can sign up for and access via the internet. Although the new software will not have the same level of functionality as our comprehensive dietary management system, it will provide an easier, and less expensive entry point into the software world for many new customers. We hope you like the look as much as we do!

Kindest Regards,

Garth Smith
President – Momentum Dietary Solutions
